SUMMARY

Motivated Computer Applications student with hands-on experience in AI/ML, full-stack development, and game development. Proficient in Java, Python, React.js, FastAPI, and deep learning frameworks. Proven ability to deliver projects independently and contribute effectively in team settings.

PROFESSIONAL EXPERIENCE

Software Development Engineer Intern, CIE, PES University - Designing and building components for the CIE Idea Evaluation Engine using React.js, Fast-API (Python), and PostgreSQL. - Built an IoT quadruped robot dog (Arduino + servo motors); modified 3D-printed chassis, integrated sensors, and developed custom firmware extending locomotion to include backward movement beyond the original design. - Compiling and analyzing participant data for the CIE Ignite Ideathon to support program evaluation.	02/2026 – Present
Game Developer Intern (Part-time), CryoBolt Interactive - Designed and implemented levels and mission flows for Supply Chained (Steam demo), supporting gameplay and testing for 30+ missions in C# using Unity Engine - Conducted play-testing and QA for Whispers in Paradise using Unity, identifying bugs and enabling iterative improvements.	08/2024 – 12/2025
Research Intern, MBA Department, PES University Collected and organized 800+ research papers on electric vehicles, consumer behavior, and emissions; structured literature review for an academic study on EV adoption in India.	09/2025 – 11/2025
Freelance Game Developer, Comdia Technologies Pvt Ltd Transformed 400+ Unity assets into functional prefabs for the Vybe Video game; organized assets, assigned components, and ensured smooth integration into the in-editor building pipeline using C#.	06/2025 – 07/2025

EDUCATION & CERTIFICATIONS

Bachelor of Computer Applications - PES University Awards: Prof. CNR Rao Scholarship (4th Sem) · Distinction Award (5th Sem)	07/2023 – Present
McKinsey & Company - Forward Program Selective 10-week program training participants in McKinsey's problem-solving frameworks, structured communication, and digital & AI literacy	10/2025 – 12/2025

SKILLS

Languages & Frameworks C#, Java, Python, React.js	AI/ML Computer Vision, YOLOv8, RAG, LLMS, FAISS
Tools Unity, Git, GitHub, Tableau, Roboflow	Practices API Development, Software Testing, Agile

PROJECTS

CIE University Management System, Centre of Innovation and Entrepreneurship - Next.js · TypeScript · PostgreSQL · Prisma · Python · Mistral AI · Google Gemini Architected and built a multi-module institutional platform from the ground up, serving Admin, Faculty, and Student roles across program management, lab/library operations, and recruitment. - Developed an AI-powered resume ranking engine using Mistral AI and FAISS vector similarity search, processing bulk PDF uploads with a custom Node.js–Python bridge and live streaming UI. - Leveraged Google Gemini for automated image recognition of lab components. Designed a scalable Prisma + PostgreSQL data layer with structured RBAC and persistent AI-generated insights stored as JSON.	02/2026 – Present
AI-Based Dental X-Ray Analyzer — ABSMIDS Dental College Built a YOLOV8 + Roboflow model to detect and differentiate mandibular third molars from panoramic X-rays; integrated Kharma scale parameters to automatically assess extraction difficulty based on angulation, depth, and ramus space.	09/2025 – 01/2026

Courses

Strategy & Game Theory for Management, IIM Ahmedabad (Coursera)
